# Thacker-Grigsby Telephone Company 47 CFR§54.313(a)(5) Certification that it is complying with applicable service quality standards and consumer protection rules For voice and broadband services

In establishing this certification in its 2005 ETC Order, the FCC found that an ETC must make "a specific commitment to objective measures to protect consumers." The Commission found that for wireless ETCs, compliance with CTIA's Consumer Code for Wireless Service would satisfy this requirement" and that the sufficiency of other commitments would be considered on a case-by-case basis. In this context, the FCC stated, "to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement."

Thacker-Grigsby Telephone Company ("Company") hereby certifies that it is complying with applicable service quality standards and consumer protection rules. The Company is subject to consumer protection obligations under the Kentucky Revised Statutes (KRS) and Kentucky Administrative Regulations (KAR). These obligations include, but are not limited to, the following:

(1) filing a Local Exchange Tariff pursuant to the requirements of KRS Chapter 278.541 to 278.544 and 807 KAR 5:011, which discloses rates, terms and conditions of service to customers;

<sup>&</sup>lt;sup>1</sup> Federal-State Joint Board on Universal Service, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) ("2005 ETC Order").

<sup>&</sup>lt;sup>2</sup> *Id.* The FCC noted that under the CTIA Consumer Code, wireless carriers agree to: "(1) disclose rates and terms of service to customers; (2) make available maps showing where service is generally available; (3) provide contract terms to customers and confirm changes in service; (4) allow a trial period for new service; (5) provide specific disclosures in advertising; (6) separately identify carrier charges from taxes on billing statements; (7) provide customers the right to terminate service for changes to contract terms; (8) provide ready access to customer service; (9) promptly respond to consumer inquiries and complaints received from government agencies; and (10) abide by policies for protection of consumer privacy." *Id.* at 71.

Thacker-Grigsby Telephone Company 260419KY510

- (2) adherence to Kentucky state consumer protection requirements governing telephone providers which include Consumer protections as identified in KRS Chapter 278.546, Pricing Procedures as illustrated in KRS Chapter 278.542(1), and Compliance with Anti-Slamming Procedures as adopted in KRS Chapter 278.535;
  - (3) truth-in-billing requirements as required in 807 KAR 5:061, Section 13;
- (4) CPNI, Red Flag Rules and other applicable federal and state requirements governing the protection of customers' privacy; and
- (5) Records maintenance and service objectives reporting required under 807 KAR 5:061, Section 4 (4) related to the following: i) Provision of Service 807 KAR 5:061, Section 10(1); ii) Dial Service Requirements 807 KAR 5:061, Section 15(1) and (2); iii) Answering Time 807 KAR 5:061, Section 22(1) and (2); and iv) Service Interruption 807 KAR 5:061, Section 25(3) and (4).

# Thacker-Grigsby Telephone Company Demonstration of Ability to Function in Emergency Situations Voice and Broadband Services

47, Part 54, Subpart C, §54.202(a)(2)

Thacker-Grigsby Telephone Company ("Company") hereby certifies that it is able to function in emergency situations as set forth in the Code of Federal Regulations, Title 47, Part 54, Subpart C, §54.202(a)(2) <sup>1</sup> as well as and the Kentucky Administrative Regulations, 807 5:061, Section 24. The Company's network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2).

The Company supports both its broadband and voice networks by deploying battery back-up capability throughout its network that allows it to remain fully operational even when power outages preclude use of an external power source. Each central office building is supplied with standby generators and battery back-up that enable the central office to keep running for at least the minimum of four (4) hours. The Company has battery back-up at all office locations and in its electronic equipment sites. In addition to battery back-up at all critical network element locations, the Company has standby generators, fueled by propane and /or natural gas, capable of running at least one week before refueling would be necessary. All stand-by generators are automatically exercised once a week. If a generator malfunction occurs during test mode or during a power outage, it sends an alarm through the Company's central office alarm system and

<sup>&</sup>lt;sup>1</sup> (1) Each telephone utility shall have a written plan to meet service emergencies resulting from failures of power service, sudden and prolonged increase in traffic, fire, storm, or acts of God. Each telephone utility shall train employees in procedure to be followed in an emergency. (2) All central offices and toll centers shall adequately provide for emergency power. Each central and/or toll office shall have a minimum of four (4) hours of battery reserve. In exchanges exceeding 5,000 lines and in toll offices, a permanent auxiliary power unit shall be installed. In offices without installed emergency power facilities there shall be a mobile power unit available of suitable capacity which can be delivered and connected within two (2) hours, or one-half (1/2) the battery reserve time, whichever is greater.

its technical staff is immediately notified. Many non-critical network elements also have

permanent standby generators as described above. Any non-critical location which does not

have a permanent standby generator has a suitable size mobile power unit available which can be

operational at the site within one hour.

Critical portions of the Company's voice and broadband networks are fully redundant and

/ or operate in a self-healing ring configuration for instantaneous redirection of traffic /

connectivity in the event of facility damage. This ability to change its call routing also allows

the Company to manage traffic spikes throughout its network, as emergency situations require.

The Company uses alternate carriers for broadband network diversity wherever practical.

Additionally, the Company maintains a written plan in place to meet service emergencies

resulting from failures of power service, sudden and prolonged increase in traffic, fire, storm, or

acts of God, and has trained employees on emergency procedures.
